ASSESSMENT GUIDANCE FOR LEARNERS

CMI provides a comprehensive external quality assessment service. Currently all units within the Management and Leadership qualifications from Level 2 to 7 have an assignment brief available.

CMI provides a six week service level on all assignments received.

Learners are required to complete all tasks and Assessment Criteria.

ASSESSMENT GUIDANCE

Submission directly to CMI EA Marking

All work must be submitted in a single electronic document (.doc file). The document must be marked with your full name, P number and unit number. Electronic assignments should be sent to ea.marking@managers.org.uk

Please note CMI do offer a paper based assignment service for learners that are unable to provide an electronic copy only. Please post the assignment to External Assignments, Awarding Body, Management House, Cottingham Road, Corby, Northamptonshire, NN17 1TT.

The assignment should be your own work and not direct copies of theories or models. Any models described and other quotes used must be properly attributed and referenced as appropriate. Learners must acknowledge or reference any sources that have been used to complete the assignment, listing reference material and web sites used, appendices must not be included.

Learners are encouraged to produce a reflective statement of no more than 300 words (which does not count towards the final word count), describing the value and knowledge gained from undertaking this assignment. The reflective statement is not assessed; however it encourages you to review the value and application of your learning.

PLAGIARISM & COLLUSION

In submitting the assignment the learner must complete a statement of authenticity (included in the Completion Pack) confirming that the work submitted for all tasks is their own and does not contravene CMI policies including word count and plagiarism.

Academic offences, including plagiarism and collusion, are treated very seriously. Plagiarism involves presenting work, excerpts, ideas or passages of another author without appropriate referencing and attribution. Collusion occurs when two or more learners submit work which is so alike in ideas, content, wording and/or structure that the similarity goes beyond what might have been mere coincidence. Plagiarism and collusion are very serious offences and any learner found to be copying another learner's work or quoting work from another source without recognising and disclosing that source will be penalised.

In submitting their assignment for the unit, and completing the relevant statement of authenticity, learners are confirming that the work submitted for all tasks is their own and does not contravene the CMI policies including word count, plagiarism and collusion. CMI reserves the right to return assignments if the necessary statements of authenticity have not been completed.

Learners found to be in breach of these regulations will be reported to the relevant CMI contact for deliberation. The learner will be notified in writing of the outcome of the investigation. In the event that a learner is found to have perpetrated malpractice, the learner will be withdrawn from his/her qualification immediately; fees will not be refunded, the relevant Regulatory Body will be informed and membership of the CMI will be withdrawn.

APPENDICES

Appendices should not be included. All use of tables, graphs, diagrams, Gantt charts and flowcharts should be incorporated into the main text of the assignment. Any published secondary information such as annual reports and company literature, should be referenced in the main text of the assignment but not included.

CONFIDENTIALITY

Where learners are using organisational information that deals with sensitive material or issues, they must seek the advice and permission from that organisation about its inclusion in an assignment. Where confidentiality is an issue, studying members are advised to anonymise their assignment so that it cannot be attributed to that particular organisation.

WORD COUNT POLICY

Please refer to assignment briefs for each unit word count. Learners must comply with the required word count, within a margin of +10%. These rules exclude the index (if used), headings, information contained within references and bibliographies. When an assessment task requires learners to produce presentation slides with supporting notes, the word count applies to the supporting notes only.

Where a learner's work has contravened the word count policy, it will be reviewed by the Marker and Lead Moderator before a final decision is made.

REFERENCING & PROFESSIONALISM

A professional approach to work is expected from all learners. Learners must therefore identify and acknowledge ALL sources/methodologies/applications used. The learner must use an appropriate referencing system to achieve this. Whilst marks are not awarded for the use of English, the learner must express ideas clearly, succinctly, and ensure that appropriate terminology is used to convey accuracy in meaning.

INSTRUCTIONS & INFORMATION FOR LEARNERS

The external assignment is set and assessed by the Chartered Management Institute. It is designed to assess your achievement of all the Learning Outcomes and associated assessment criteria in the relevant unit of the qualification you are undertaking.

You should make sure that you plan your work carefully, to ensure that you cover all the requirements of the assignment, and complete it within the time limit specified.

Your statements, in answer to the tasks, need to be prefixed with the specific task number and unit title. This will help you keep on track and should ensure you address the details. Work submitted without a task prefix will be returned unmarked. Your statements should not be just a description of workplace activities but should include what you have learned from your programme of study. In other words you need to show how you can relate what you have learned to day-to-day management activities.

You must submit your work as a single electronic word document (.doc file). You should mark the assignment with your name, learner number, the unit number, your Centre name – Britannia Royal Naval College - and a brief description of the context in which the assignment was undertaken. You may include a title page if you wish. You must show a total word count on the front page of your assignment. You are strongly advised to keep a copy of your completed assignment before you submit it for assessment – the copy you submit will not be returned to you. Your assignment may be kept by the CMI for quality assurance purposes. Any assignment not kept for quality assurance will be securely destroyed.

CMI will assess your assignment, and the result will be sent to you, normally within 6 weeks of receipt by the Institute.

If your assignment is assessed as referred, notification will be sent to you with an indication of the areas to be addressed. You may resubmit an assignment on a further two occasions during your period of registration as a CMI learner.

If there is anything in these instructions or in the assignment itself which you do not understand, please seek guidance from CMI by phone on 01536 207496.

1a. The factors which influence the way individuals and teams are developed and led

DEVELOP, MANAGE AND LEAD INDIVIDUALS AND TEAMS TO ACHIEVE RESULTS

Organisational success is realised when individuals and teams are supported to achieve their objectives. This assessment task has been written to enable managers and leaders to evidence their understanding of approaches to individual and team development and the skills required by them to lead and develop individuals and teams with impact.

SCENARIO

You are working for XYZ*, a rapidly expanding organisation which has recently relocated some of its staff to a new site in a neighbouring town, Hamborough, and is 15 miles away. The new open-plan premises are designed to accommodate more flexible and efficient ways of working, with an emphasis on maximising the use of different and new technologies.

Due to the relocation, there has been a radical change in the workforce as a number of permanent members of staff chose to take redundancy rather than relocate and/or change their methods of working. XYZ. has active members of two different trade unions.

The new Hamborough site has a diverse staff team. The new staffing mix is about 50% staff who have relocated having been with the company for a number of years, and 50% newly appointed staff. Many of the staff who have relocated are in senior or middle management positions; many of the new staff are younger, including a proportion of recent university graduates.

Some of the senior management are nearing the end of their careers and find the change in organisational culture challenging. Some also find the changes in technologies difficult to assimilate; conversely, others are very keen to embrace all new technologies to achieve revised organisational objectives.

Many of the staff who have relocated to Hamborough had their own individual offices at the original site, and are used to working on their own. The new open-plan premises place an emphasis on collaborative working, including with teams in newly opened markets overseas.

***Please note:** You may customise the scenario by selecting the type of organisation referred to (e.g. manufacturing and production, services, education, finance). This will enable you to contextualise your response to meet the requirements of the tasks below.

TASK 2

Basing your response on the Scenario above or an organisation you know well or have researched you are required to write a **proposal** entitled:

'Developing, managing and leading individuals and teams to achieve results'

The proposal must include reference to theoretical concepts and well-chosen examples to support the information presented. It must be presented in **THREE (3)** sections:

2a. Approaches to team development

You are required to critically assess approaches to team development. (AC2.1)

2b. Approaches to manage and develop individuals

You are required to evaluate approaches to manage and develop individuals. (AC2.2)

2c. Skills required to lead and develop individuals and teams to achieve results

You are required to critique the skills required to lead and develop individuals and teams to achieve results. (AC2.3)

Guidance for completion of Task 2

INTRODUCING ASSESSMENT BRIEF CMI 603

Being equipped with the knowledge, skills and behaviours to manage and lead in a variety of organisational settings is essential if an individual and their organisation are to succeed.

Assessment brief **CMI 603** has been designed to enable learners to evidence their understanding of culture and the beliefs, principles, ideologies, behaviours and values which have the power to influence an organisation's success. The amount and volume of work for this unit should be broadly comparable to a word count of **3000-3500 words** within a margin of +/-10%. The excessive use of word count is not grounds for referral, however the CMI reserves the right to return work to the Centre for editing and resubmission by the Learner.

The following are excluded from inclusion in word count, if used and not required by the assessment brief an introduction to a job role, organisation or department, index or contents pages, headings and subheadings, diagrams, charts and graphs, reference list or bibliography, reflective statement drawn from undertaking the assignment and how this has impacted on the learner's work.

Please see the CMI Assessment Guidance Policy for further guidance.

THE ROLE OF CULTURE WITHIN ORGANISATIONAL CONTEXTS

Recognised definitions for culture define it as a 'deep set of unconscious unwritten assumptions, shared throughout an organisation which are handed down over time and serve to sustain its identity' (Schein, 1988, Johnson et al., 2011). Another definition for culture is simply, 'The way we do things around here' (Deal & Kennedy, 2000). This assessment task has been designed to enable managers and leaders to understand the role culture plays in different organisational contexts, what influences it, and the inter-relationship between culture and leadership.

TASK 1

You are required to write a **report** entitled:

The role of culture within organisational contexts'

The report must include reference to theoretical concepts and examples of culture within different organisational contexts. The report must be presented in **THREE (3)** sections.

1a. The impact of culture within different organisational contexts

You are required to consider the impact of culture within different organisational contexts. (AC1.1)

1b. The factors which influence organisational culture

You are required to critically examine the factors which influence organisational culture. (AC1.2)

1c. The inter-relationship between culture and leadership

You are required to critique the inter-relationship between culture and leadership (AC1.3)

Guidance for completion of Task 1

- *The report should include subheadings. You may choose to include tables and diagrams (as appropriate) to support your discussion.*
- *The report must include relevant theoretical principles.*
- *You must include examples from an organisation you know well or have researched.*
- *Please refer to the indicative content for each assessment criteria (AC) outlined in the unit specification.*

APPROACHES REQUIRED TO MAKE AND SUSTAIN CULTURAL CHANGE

There will be times within a professional manager and leaders' career when they will be required to work with an organisation to make and sustain cultural change. This assessment task has been designed for the professional manager and leader to take an in-depth look at approaches to making and sustaining cultural change and the theoretical concepts and frameworks which underpin this activity.

SCENARIO

ABX was an organisation founded in 1920 by a family who owned and managed it through the generations. Three months ago, ABX was bought out by a large public limited company called CAPITAL@ and the family ties to the business were cut.

CAPITAL@ are well known for innovative approaches in using technology, managing staff and stakeholder relationships. They have recently been in the press as they are anticipating large profits for the coming financial year which will result in an increase in the dividends paid to its shareholders.

There was a dedicated staff team at ABX, many of whom had worked in the organisation for decades. An audit showed working practices and the use of technology was dated, however knowledge capital was significant and the reputation of those who worked for ABX was high. There is apathy towards any change (processes, procedures, new organisational vision). There is a perception that CAPITAL@ is driven by the use of aggressive outcomes.

Existing staff are fearful of the future, and are not enthused by the prospect of being led by a new management and leadership team and are wary of working collaboratively with new colleagues etc. There is a feeling of tension and distrust between the new recruits and existing staff.

There is an urgent need to bring together the divergent staff teams, unite them in a common purpose and ensure that this is maintained over time. You have been challenged to develop a proposal to make this happen.

TASK 2

Basing your response on the Scenario, or a cultural change within an organisation you know well or have researched, write a **proposal** entitled:

'A proposal to make and sustain cultural change'

The proposal must include:

- The vision for cultural change and evaluation of current position
- An implementation plan to make and sustain cultural change
- Strategies which will support cultural change
- Strategies to monitor and evaluate outcomes
- Strategies to sustain cultural change (AC2.1)

Guidance for completion of Task 2

- Choose the basis your proposal. This may be based on the scenario given above or a cultural change in an organisation you know well or have researched.
- The proposal may be presented in a format of your choice (i.e. narrative, report, table).
- You are encouraged to consider the use of good practice examples from an organisation you know well or have researched.
- You must include reference to relevant theoretical principles/models/frameworks as appropriate.
- Please refer to the indicative content for each assessment criteria (AC) outlined in the unit specification.

INTRODUCING ASSESSMENT BRIEF CMI 614

The ability to make ethical decisions under pressure is a fundamental requirement of a professional leader and manager. Ethical decision making is not easy, especially when decisions are under the spotlight of stakeholder opinion, constrained by organisational, legal and regulatory requirements, where ambiguity exists, where risks are high or where the outcome of decisions will be unpopular.

Assessment brief **CMI 614** has been designed to enable professional managers and leaders to evidence their understanding of how to make ethical decisions in different organisational contexts.

ASSESSMENT TASK AND WORD COUNT

Assessment brief **CMI 614** features the following assessment tasks. Further detail is provided against each assessment task within the brief.

| Assessment Task | | Learning outcomes covered by assessment method | Assessment criteria | Guideline word count |
|-----------------|---|---|---|----------------------|
| 1 | Produce a report or reflective account entitled: <i>'Ethical decision making within organisational contexts'</i> | LO1 Understand ethical decision making within organisational contexts | 1.1 Critically assess the influence of organisational context on decision making | Approx. 1500 words |
| | | | 1.2 Critically appraise personal values and behaviours required to make ethical decisions | |
| | | | 1.3 Evaluate the challenges of ethical decision making | |
| 2 | Write a report or a reflective account entitled: <i>'Ethical decision making'</i> | LO2 Know how to make an ethical decision | 2.1 Critically appraise the types and sources of data and information available to inform ethical decision making | Approx. 2000 words |
| | | | 2.2 Recommend tools and techniques for ethical decision making | |
| | | | 2.3 Present the justification for the ethical decision made | |

Guideline word count

The written word, however generated and recorded, is still expected to form the majority of assessable work produced by Learners at Level 6. The amount and volume of work for this unit should be broadly comparable to a word count of **3000-3500 words** within a margin of +/-10%. The excessive use of word count is not grounds for referral, however the CMI reserves the right to return work to the Centre for editing and resubmission by the Learner.

The following are excluded from inclusion in word count, if used and not required by the assessment brief an introduction to a job role, organisation or department, index or contents pages, headings and subheadings, diagrams, charts and graphs, reference list or bibliography, reflective statement drawn from undertaking the assignment and how this has impacted on the learner's work.

ETHICAL DECISION MAKING WITHIN ORGANISATIONAL CONTEXTS

Task 1 has been designed to enable the professional manager and leader to critically assess the organisational context in which decisions are made. They will have the opportunity to critique the personal values and behaviours required to make ethical decisions and evaluate challenges which impact on decisions made.

TASK 1

There are **TWO (2)** options for completing Task 1.

You are required to produce a **report** or **reflective account** entitled:

'Ethical decision making within organisational contexts'

The report or reflective account must include well-chosen examples from an organisation you know well or have researched. The report or reflective account must be presented in **THREE (3)** sections:

1a. The organisational context in which decisions are made (AC1.1)

To complete this section, you are required to critically assess the influence of organisational context on decision making.

1b. Personal values and behaviours required to make ethical decisions (AC1.2)

To complete this section, you are required to critically appraise a minimum of **FOUR (4)** personal values and behaviours required to make ethical decisions.

1c. Challenges of ethical decision making (AC1.3)

To complete this section, you are required to evaluate a minimum of **THREE (3)** challenges of ethical decision making.

Guidance for completion of Task 1

- *The report or reflective account should include subheadings. You may choose to include tables and diagrams (as appropriate) to support your discussion.*
- *Your report or reflective account should be underpinned with relevant theoretical principles.*
- *You must include well-chosen examples from an organisation you know well or have researched.*
- *Please refer to the indicative content for each assessment criteria (AC) outlined in the unit specification.*

MAKING AN ETHICAL DECISION

The ability to make an ethical decision relies on an in-depth understanding of the issues and contexts which impact on decision making. This is undoubtedly one of the most complex tasks required by a professional manager and leader.

Task 2 has been designed to enable the professional manager and leader to make an ethical decision. To do this they will critically appraise the types and sources of data and information, tools and techniques to inform the ethical decision they will make. They will present a justification for the ethical decision made.

SCENARIO

The following scenarios are examples of ethical decisions faced by professional managers and leaders in different organisational contexts. This list is not exhaustive and it is appropriate to choose an alternative scenario for the purpose of completing Task 2.

- Selecting an internal applicant for a promotion. Applicant A is a long-term work colleague. Applicant B is new to the department and has a protected characteristic (Equality Act 2010).
- Introducing more flexible employment conditions (e.g. 9-day fortnight, annualised hours, 4-day week, 7-day week).
- Considering whether to out-source or off-shore existing services and functions.
- Prohibiting personal business in company time.
- Closing part of the business to ensure the overall security and viability of the whole business.
- Procuring resources (e.g. consideration of cost versus corporate social responsibility and sustainability, levels of profitability).
- Entering business/sales agreements with organisations in countries which have a poor record in human rights.

TASK 2

Basing your response on one of the scenarios given above or an ethical decision in an organisation you know well or have researched you are required to write a report or a reflective account entitled:

'Ethical decision making'

The report or reflective account must evidence how an ethical decision has been made. It must be presented in **THREE (3)** sections:

2a. Types and sources of data and information available to inform ethical decision making

To complete this section, you are required to critically appraise the types and sources of data and information available to inform ethical decision making. (AC2.1)

2b. Tools and techniques for ethical decision making

To complete this section, you are required to recommend tools and techniques for ethical decision making. (AC2.2)

2c. The justification for the ethical decision made

To complete this section, you are required to present the justification for the ethical decision made. (AC2.3)

Guidance for completion of Task 2

- *In preparation to complete this task, take time to reflect on ethical decision making within different organisational contexts.*
- *Select the basis of the ethical decision you will make (e.g. use of a scenario given above or ethical decision making in an organisation you know well or have researched).*
- *You must outline the ethical decision which forms the basis of Task 2.*
- *The report or reflective account must include subheadings. You may choose to include tables and diagrams (as appropriate) to support your discussion.*

- You must include reference to models of decision making and tools and techniques which support decisions made.
- Refer to the indicative content for each assessment criteria (AC) outlined in the unit specification.

Aims of unit The ability to drive innovation and change is an essential skill for a professional manager and leader. Innovation, defined simply as 'doing something new or different,' is a powerful catalyst for change. It can revolutionise an organisation's operational activities, create dynamic new opportunities, and contribute to the achievement of strategic goals. Change occurs in many forms and leaders must be able to respond to changes which are radical, incremental or evolutionary.

This unit has been designed to enable the professional manager and leader to understand innovation and change within organisational contexts. It explores the rationale for innovation and change, such as the impact of technology and digitalisation. Most importantly it focuses on the knowledge, values and behaviours that ultimately will equip the professional managers and leaders to successfully drive innovation and change.

Keywords Innovation, change, organisational contexts, theory, contemporary thinking, leadership, behaviours, values, planning, process, impact, evaluation, investigation.

Aims of unit Coaching is a powerful learning and development tool. Used effectively, it is able to optimise individual and team performance and the achievement of organisational goals. Coaching has rapidly become an essential leadership tool. It enables the professional manager and leader to support, motivate and empower individuals and teams in a conversational and insightful way. This contrasts with and complements the use of traditional directive leadership approaches.

This unit focuses on these specific coaching skills, techniques and approaches that are required by leaders to develop the knowledge, skills and resourcefulness of individuals. It focuses on the benefits and types of coaching used by leaders in different contexts and how the application of coaching impacts in the organisational environment.

A key part of this unit is for leaders to critically reflect on their own ability to coach individuals and identify opportunities for improvement. In order to achieve this, learners will need to use coaching skills in their leadership practice.

Aims of unit The ability to make ethical decisions under pressure is a fundamental requirement of a professional manager and leader. Ethical decision making is not easy, especially when decisions are under the spotlight of stakeholder opinion, constrained by organisational, legal and regulatory requirements, where ambiguity exists, where risks are high or where the outcome of decisions will be unpopular.

All decisions involve some form of value-based judgement and could involve ethical considerations. Whilst mechanistic decision making is the ability to select an action from different alternatives, ethical decision making focuses on value-based judgements and a wider range of issues that are typically more complicated in nature.

The aim of this unit is to equip professional managers and leaders with the understanding of how to make ethical decisions in different organisational contexts.
