

SKILLS SCANS FOR APPRENTICES

The CMI has developed Skills Scans that link to the Learning Outcomes for all of the Apprenticeship Standards that we provide the End Point Assessment for.

You should choose the Skills Scan for the Apprenticeship Standard you will be undertaking and grade yourself 1-4 against all of the Learning Outcomes listed.

Once you have completed you should share this document with your training provider, they will then be able to complete the full diagnostic assessment.

LEVEL 3
